Research Analysis

HB 1748 modifies hotel tornado safety rules. This measure requires the State Board of Health to promulgate rules regarding tornado safety and requires all hotels under construction and all existing hotels as those hotels update safety information, to post tornado safety information in every room and common area. A minimum requirement is for the tornado safety information to list the county the hotel is in, hotel location on a state map, and tornado safety tips on what to do in the event of a tornado.
