**Research Analysis**

The second proposed committee substitute for HB 2179 separates the medical marijuana grower license into tiers for indoor grow facilities, greenhouse or light deprivation grow facilities, outdoor grow facilities, and grow facilities that produce clones from nonflowering plants. The annual license application fee for the first tier of each category of grow facility is \$2,500, and the fee increases by tier based on square footage.

From OMMA:

This will certainly increase our licensing fee revenue, but we currently have no way of knowing how much revenue will be generated as we do not have data regarding current sizes of grows.
