24

1 Section 2-309I. A. A practitioner shall not issue an initial  
2 prescription for an opioid drug in a quantity exceeding a seven-day  
3 supply for treatment of acute pain. Any opioid prescription for  
4 acute pain shall be for the lowest effective dose of an immediate-  
5 release drug.

6 B. Prior to issuing an initial prescription for an opioid drug  
7 in a course of treatment for acute or chronic pain, a practitioner  
8 shall:

9 1. Take and document the results of a thorough medical history,  
10 including the experience of the patient with nonopioid medication  
11 and nonpharmacological pain-management approaches and substance  
12 abuse history;

13 2. Conduct, as appropriate, and document the results of a  
14 physical examination;

15 3. Develop a treatment plan with particular attention focused  
16 on determining the cause of pain of the patient;

17 4. Access relevant prescription monitoring information from the  
18 central repository pursuant to Section 2-309D of this title;

19 5. Limit the supply of any opioid drug prescribed for acute  
20 pain to a duration of no more than seven (7) days as determined by  
21 the directed dosage and frequency of dosage; provided, however, upon  
22 issuing an initial prescription for acute pain pursuant to this  
23 section, the practitioner may issue one (1) subsequent prescription  
24 for an opioid drug in a quantity not to exceed seven (7) days if:

- a. the subsequent prescription is due to a major surgical procedure or "confined to home" status as defined in 42 U.S.C., Section 1395n(a),
- b. the practitioner provides the subsequent prescription on the same day as the initial prescription,
- c. the practitioner provides written instructions on the subsequent prescription indicating the earliest date on which the prescription may be filled, otherwise known as a "do not fill until" date, and
- d. the subsequent prescription is dispensed no more than five (5) days after the "do not fill until" date indicated on the prescription;

6. In the case of a patient under the age of eighteen (18) years, enter into a patient-provider agreement with a parent or guardian of the patient; and

7. In the case of a patient who is a pregnant woman, enter into a patient-provider agreement with the patient.

C. No less than seven (7) days after issuing the initial prescription pursuant to subsection A of this section, the practitioner, after consultation with the patient, may issue a subsequent prescription for the drug to the patient in a quantity not to exceed seven (7) days, provided that:

1. The subsequent prescription would not be deemed an initial prescription under this section;

1        2. The practitioner determines the prescription is necessary  
2 and appropriate to the treatment needs of the patient and documents  
3 the rationale for the issuance of the subsequent prescription; and

4        3. The practitioner determines that issuance of the subsequent  
5 prescription does not present an undue risk of abuse, addiction or  
6 diversion and documents that determination.

7        D. Prior to issuing the initial prescription of an opioid drug  
8 in a course of treatment for acute or chronic pain and again prior  
9 to issuing the third prescription of the course of treatment, a  
10 practitioner shall discuss with the patient or the parent or  
11 guardian of the patient if the patient is under eighteen (18) years  
12 of age and is not an emancipated minor, the risks associated with  
13 the drugs being prescribed, including but not limited to:

15 drugs and the dangers of taking opioid drugs with alcohol,  
16 benzodiazepines and other central nervous system depressants;

17        2. The reasons why the prescription is necessary;

18        3. Alternative treatments that may be available; and

19        4. Risks associated with the use of the drugs being prescribed,  
20 specifically that opioids are highly addictive, even when taken as  
21 prescribed, that there is a risk of developing a physical or  
22 psychological dependence on the controlled dangerous substance, and  
23 that the risks of taking more opioids than prescribed or mixing  
24

1 sedatives, benzodiazepines or alcohol with opioids can result in  
2 fatal respiratory depression.

3 The practitioner shall include a note in the medical record of  
4 the patient that the patient or the parent or guardian of the  
5 patient, as applicable, has discussed with the practitioner the  
6 risks of developing a physical or psychological dependence on the  
7 controlled dangerous substance and alternative treatments that may  
8 be available. The applicable state licensing board of the  
9 practitioner shall develop and make available to practitioners  
10 guidelines for the discussion required pursuant to this subsection.

12 opioid drug, the practitioner shall enter into a patient-provider  
13 agreement with the patient.

15 months or more for chronic pain, the practitioner shall:

17 of treatment, any new information about the etiology of the pain,  
18 and the progress of the patient toward treatment objectives and  
19 document the results of that review;

20 2. In the first year of the patient-provider agreement, assess  
21 the patient prior to every renewal to determine whether the patient  
22 is experiencing problems associated with an opioid use disorder as  
23 defined by the American Psychiatric Association and document the  
24 results of that assessment. Following one (1) year of compliance

1 with the patient-provider agreement, the practitioner shall assess  
2 the patient at a minimum of every six (6) months;

3 3. Periodically make reasonable efforts, unless clinically  
4 contraindicated, to either stop the use of the controlled substance,  
5 decrease the dosage, try other drugs or treatment modalities in an  
6 effort to reduce the potential for abuse or the development of an  
7 opioid use disorder as defined by the American Psychiatric  
8 Association and document with specificity the efforts undertaken;

9 4. Review the central repository information in accordance with  
10 Section 2-309D of this title; and

12 any recommendations that the patient seek a referral.

13 copayment, coinsurance or deductible shall charge a copayment,  
14 coinsurance or deductible for an initial prescription of an opioid  
15 drug prescribed pursuant to this section that is either:

12 opioid therapy. The standard of care requires effective and  
13 individualized treatment for each patient as deemed appropriate by  
14 the prescribing practitioner without an administrative or codified  
15 limit on dose or quantity that is more restrictive than approved by  
16 the Food and Drug Administration (FDA).
