Bill Analysis

SB 167 directs the Oklahoma Department of Emergency Management to contract with an outside entity to develop a statewide Stormwater Management Predictive Analytic Solution. The Analytic Solution shall include early warning detection and advanced flood monitoring systems and shall be operational no later than February 28, 2026. The measure directs the Department to submit an annual report of the system to the President Pro Tempore of the Senate, Speaker of the House, and Governor beginning on August 1, 2026.
